

ROGY 360°

Quick User Guide

INTRODUCTION

Rogy is the most user-friendly live streaming 360 camera in the world. One-click enables live-streaming to Facebook, YouTube or other platforms and protocols such as RTMP, RTSP and P2P without the use of apps and computers. This provides effort-free streaming solution for 5G VR applications. The embedded 802.11AC Wi-Fi module also gives the camera a 5G Wi-Fi & Bluetooth connection capabilities. This is to guarantee the best streaming quality and longest distance to control the Rogy. The 5G VR technology allows Rogy to offer numerous solutions to industries such as gaming, entertainment, retail, education, construction, real estate, manufacturing, medical, transportation etc.

GETTING STARTED

1. Install SD card: Insert the Micro SD card into the slot.

Important: A high-speed Micro SD card U3 certified must be used, or else this product may not function normally. Always turn off the camera before inserting or removing the card.

2. Charging: For charging use the Type-C USB cable & power adapter included with the product. While charging, the indicator will stay on as a red light. When charging is complete, the LED will turn green. Important: The warranty will be voided if a non-genuine charger is used.

3. Power on: Press and hold the OK button until the "Cupola360" appears on the Status Display. (the default mode after power on is Shooting Mode).

4. Power off: To turn off the device, press and hold the OK button until the device powers off.

5. Connecting the camera to the "Cupola360" app:
 - 5.1 Please scan this QR Code to download and install "Cupola360".
 - IOS
 - Android

- 5.2 Connect smart phone to Rogy via Wi-Fi. The SSID name for the device starts with ROGY (i.e., Rogy-0000A1).

- 5.3 The password for the device is 12345678. (Refer to Advanced User Guide for detailed instruction).

WARRANTY

Thank you for your interest in our products and services. This warranty is only applicable to Rogy products purchased and sold this time. This warranty covers any missing parts or quality under normal use during the warranty period, and provides the camera (excluding accessories and consumables) with one year warranty service. The warranty period is calculated from the date of purchase and shipment. During the warranty period, if the product fails under normal use, the company will provide repair services or replacement, which will be determined by the technician.

The following situations will not be covered by the warranty:

- Any natural damage, irresistible external force, abnormal operation, or human-made damage (such as: the main unit is exposed to liquid or moisture, the casing is broken, etc.).
- The user has disassemble or altered the seal, sticker or nameplate.
- Any incorrect or improper installation, maintenance, repair, alteration or tampering with products other than those indicated in the instructions for use of the product will not be covered by the product warranty.
- The product is subject to wear and degradation due to natural disasters, misuse, accidents, natural use, improper weather conditions (such as lightning strike, flooding, rain, high temperature exposure, etc.) or lack of regular maintenance.
- The model and serial number of the product have been altered, defaced or removed.
- Damage or scratches to the appearance of the product.
- The warranty does not include any shipping costs, handling fees, or other costs not related to the product warranty.

If you have other questions related to the use and maintenance application, please call our customer service hotline or e-mail directly, and a customer service specialist will contact you.

Q & A

1. What is the connect password of Rogy? 12345678
2. The Rogy Wi-Fi LED is lit, but the smart phone is unable to find Rogy in the setting.
The default Wi-Fi setting for Rogy is 5 GHz. Please change your smart phone mobile data option to 5 GHz. If your smart phone does not support 5 GHz, please change the Wi-Fi channel in Rogy to 2.4 GHz.
3. Wi-Fi LED is still off.
If Rogy is set to Internet Mode, please ensure the Wi-Fi that you have set Rogy to connect to is working properly, otherwise change Rogy from Internet Mode to Direct Mode, or Reset Rogy.
4. Function keys are not responding.
It's possible that the software has crashed. Please long press the OK key for about 20 seconds to force it to power off then press the power key to reboot it.
5. Can't power on
Make sure Rogy has enough battery power. Connect the USB power to Rogy then press the power key to turn it on. If still unable to power on, please long press the OK key for about 20 seconds to force it to power off then press the power key to reboot it.
6. How to save the photo and video files from Rogy to computer?
Please take out the Micro SD card then insert it to the card reader. Connect the card reader to the computer to download the files.
7. Can Rogy use other Micro SD card?
Yes, it can. Please use the V3 type Micro SD card and support max. 2 TB.
8. How longer does it take to fully charge Rogy?
It needs 3 hours to fully charge Rogy.
9. Can we use Rogy while charging?
Yes, you can. Please use the bundled adaptor to charge Rogy for the best power performance and to avoid the warranty being voided.
10. How to use the Rogy as a video camera?
Power on the Rogy then connect the USB port of Rogy to the USB port of computer via the USB cable.
11. Which one is the main (front) lens?
The side that is without the shutter button.
12. It overheats when operating for a long time.
It's normal that the device will feel a bit warm after a prolong usage. The device may shut down when the temperature rises to a max tolerant level.
13. Can we change the logo of the base map?
It can't be changed right now. However, you can turn off the logo in the app setting.
